CHANGE NOTIFICATION

Product(s) Affected:

SKU/Part Number	Description	Lot
700004209, E-EXBGOS	Exo-1,3- β -D-Glucanase + β -Glucosidase	241139

Dear valued customer,

As a purchaser of the above Megazyme® by Neogen® product within the past year, we are writing to inform you of a minor change. The raw material source of the β -Glucosidase component has been changed to an alternative *Aspergillus sp.* source. However, no change has occurred to the exo-1,3- β -D-Glucanase component.

Internal validation testing has not identified any changes in product performance. However, since we are unaware of how you use this product, we recommend that you validate its efficacy in your specific methods before implementing it for routine use. This change applies to the most recently manufactured lot (#241139) and will impact all future lots.

The website and product documentation will be updated in the coming weeks to reflect this change. The product name, part number/SKU, and instructions will remain the same.

If you have any questions, please reach out to your Neogen representative for further information.

Sincerely,

Ciara McLoughlin
Quality Manager - Megazyme
